

Datacenter Solutions

Datacenter solution:

Linion DLP

EXTREME DURABILITY

The products of Illuxtron differentiate from the rest of the market in terms of durability. Only A-Brand components are made and It is a company policy to bring only products to the market with a long lifetime and a 7 year warranty.

Specially for datacenters Illuxtron took durability to the next level and did a lot of research to design a luminary with an expected lifetime of more than 10 years.

DESIGN

In a highly professional datacenter equipped with the newest servers you expect the design of the luminary to be in line with this environment. Special attention has been made to all details of the linear luminary to make sure that it has a high class appearance

OPTICAL DESIGN

During maintenance it is important that the engineers have the best light quality available. Years of research created a new optical design where performance and esthetics will go hand in hand.

FUTUREPROOF & ENVIRONMENT FRIENDLY

Why change a complete luminary when you can also change only the internal light module. Once every period servers needs to be replaced by new ones. During this short period the internal light module of the luminary can be replaced quickly so that the luminary will be updated to the latest technology. With this concept you never need to worry about renewing all your luminaries without the need of high skilled electrical contractors. In the meantime you produce less waste and contribute to the environment.

Emergency Unit

ILLUXTRON DATACENTER FLAT CABLE SYSTEM

The size of datacenters are becoming bigger and bigger. During building and installation many contractors are working at site under high stressed

conditions. Illuxtron has designed a Plug & Play Flat cable system which give you the possibility to minimize installation faults and save on installation time.

DATACENTER

All products are developed by our own people and then assembled in various workshops by people with a disadvantage on the labor market. The range is aimed at the higher market segment and guarantees the use of high quality materials, resulting in a warranty of 7 years. 7 years warranty can be guaranteed.
