Make it your own.

MAKE IT YOUR OWN

UNIQUE IN EVERY WAY

Do you wish that our product range could match your requirements a little better? We will always gladly suggest a suitable product for your needs. We are able to make simple adjustments to features such as colour or size, however we also don't shy away from more complex challenges either. We design fixtures specifically tailored to your requirements.

The luminaires from the collection are assembled to order in our social workshops and in-house workshops. This enables us to choose from a large stock of lighting components.

LET'S BE CREATIVE

Any of our existing parts can be used when creating a brand new design. Should special parts be required, we can quickly and easily have them made by our large network of suppliers.

As a result of this special division, we are able to offer a complete package. There is a wide choice of assorted and custom made products at competitive prices.

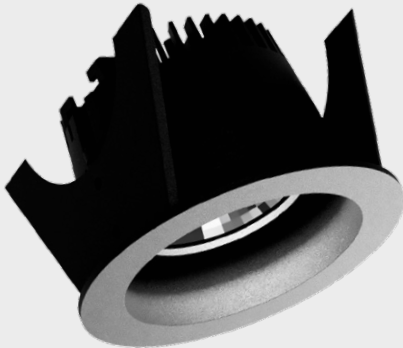

EXAMPLE OF MAKING IT YOUR OWN: CABLE TRUNKING ACCENT LIGHT

Cable trunking is used more and more. Not only for construction purposes, but also for a minimalistic aesthetical look in open spaces. Illuxtron MIYO was asked if a flexible and cost-effective spot could be created. Our solution was to use our Odion luminaire with special High CRI COB's. The use of our Flat-Cable system made electrical installation flexible and easy!

EXAMPLE OF MAKING IT YOUR OWN: FLUXE 75 PENDANT

Illuxtron has the Cylinder CL 100 that is surface mounted, but it has a fixed height. For a project with a cove, we designed a flexible solution. We added a regular 75mm spot (Fluxe/Linea etc) to a tailor-made aluminium tube. We are now super flexible and can do different heights, colours or even pendant versions.

EXAMPLE OF MAKING IT YOUR OWN: POINTER SPOT SM

The Pointer is an amazing recessed spot with a nearly invisible light source thanks to the special lens technology. But why not use it as a stylish surface mounted twin spot? By using our existing technology and custom made CNC parts we were able to fulfil the customers project requirements.

Any questions?

If you have a special request that meets the requirements, we can make it for you!
